FOR IMMEDIATE RELEASE

SCHLAGE TO DEMONSTRATE EXPANDED CAPABILITIES FOR SCHLAGE LiNK™ REMOTE HOME-MANAGEMENT SYSTEM AT 2011 CES

*Video recording, sensor integration and high-resolution video mode
top the list of new features*

LAS VEGAS, NV, January 6, 2011 – Schlage, a strategic brand of Ingersoll Rand, which is a world leader in creating and sustaining safe, comfortable and efficient environments, will demonstrate several new capabilities for its Schlage LiNK™ remote home-management system at the 2011 CES, which kicks off today in Las Vegas. With these new features, which provide even more control over the home, Schlage LiNK owners will be able to record and archive footage recorded by video cameras in the home, integrate Z-Wave® enabled sensors and create time-based access codes.

The Schlage LiNK System allows homeowners to monitor and control Z-Wave enabled locks, lights, Trane thermostats, Schlage cameras and other Z-Wave devices from most web based mobile phones including iPhone®, Blackberry® or Android™ phones or a computer connected to the Internet.

“These new capabilities and features are the result of feedback we received from our customers who value the Schlage LiNK System but want it to do even more,” said Dwight Gibson, vice president and general manager, Connected Home Solutions for Ingersoll Rand, the parent company of Schlage. “We took to heart what they asked for and today are announcing new features that will enable Schlage LiNK users to more closely monitor what is happening in the home with sensors and enjoy the added security that comes with being able to record and archive video from cameras at home.”

New features and capabilities being demonstrated at CES include:

- **Sensor Integration** - the Schlage LiNK System will provide support for Z-Wave enabled sensors enabling homeowners to check the status of their windows and doors, detect motion in and around the home as well as water from flooding or pipe bursts. Available in second half of 2011.
- **Video Recording** - stores footage from Schlage cameras in the home on a secure server which can be accessed via the Internet from any location, at any time via the Schlage LiNK Web application. Recording can be triggered by door/window or motion sensors, an access code or scheduled recording. Available in second half of 2011.
- **Schlage LiNK Next Generation User Interface** – concepts for the next generation Schlage LiNK web interface will be on display that provide customers with a more intuitive experience and one-stop dashboard view of their home. Available in second half of 2011.
- **Time-Based Access Codes** - allows for the creation of time-limited user access codes for repairman, dog walkers, cleaning services, etc providing added flexibility and security. Codes can be set up to work one time only or for recurring use on certain days during specific time periods. Available now.
- **High-Resolution Video Setting** - the Schlage LiNK web application now features enhanced (640 x 480) video quality and an expanded viewing window that improves the user experience when monitoring video from cameras. Users can select between high and low resolution video quality. Available now.
- **Android App** – Schlage will demonstrate the new app that allows Android phone users to control their Schlage LiNK System. Available now.

The Schlage LiNK System

The basic Schlage LiNK Starter Kit (\$299) includes a keypad lock or deadbolt, a remote control lighting module and everything needed to set up a wireless Z-Wave network in the home. A single Schlage LiNK System will support an unlimited number of IP network cameras and up to 232 Z-Wave enabled devices, all of which would be covered under one \$8.99 per month subscription fee. Options include the Schlage WCW100 wireless camera (\$179), Schlage WCE100 wired camera (\$149), Trane Remote Energy Management Thermostat (\$149, model TZEMT400AB32) and Schlage light module (\$49.99).

The Schlage LiNK System is available in more than 2,700 retailers across the country including select RadioShack, Lowe's and Best Buy stores as well as through a number of online retailers, including Amazon.com, BestBuy.com, GoKeyless.com, HomeDepot.com, TigerDirect.com and CompUSA.com.

The Schlage LiNK mobile application is available for Google's Android platform, the Apple iPhone and Research in Motion's BlackBerry as well as devices running Microsoft's Windows Mobile 5 or higher and phones compatible with Java (J2ME).

The Schlage LiNK System will be demonstrated in Schlage booth 21423, lower level South Hall and in the Z-Wave Alliance booth 20901 South Hall and Dr. Bott booth 4435 in North Hall.
